

The kitchens at Lansdowne Resort proudly use ingredients obtained from local growers and sustainable farms whenever possible. Buying locally reduces the environmental impact of long distance shipping, supports the local economy, and ensures the freshest possible meats and produce. Working with sustainable farmers ensures that quality food will be available for generations to come.

Cooking Green. It's better for our customers. It's better for our community. It's better for our environment. It's just better.

even our food is green
